ENGINE

Manufacturer, model	Cummins, QSB 6.7
Type	6-cylinder turbocharged diesel engine, COM III/EPA III
Combustion	4-stroke cycle, Common Rail injection
Displacement	6700 cm ³
Net power rating at 2200 rpm (ISO 9249)	149 kW (203 hp)
Cooling system	Water

ELECTRICAL SYSTEM

Nominal voltage	24 V
Lighting system in compliance with German and European standards	

POWER TRANSMISSION

Hydrostatic drive, closed circuit, independent from loader hydraulics. Driving automatics, that is, automatic optimization and adjustment of drawbar pull and speed. The travel drive in closed circuit additionally acts as non-wearing service brake. Hydraulic motor power shift providing two speed ranges. Infinitely variable speed control forward and reverse. 4-wheel drive from reduction gear on rear axle via cardan shaft to front axle. One inch-brake-drive pedal for sensitive driving and stopping at high engine speed.

2 gears:	
„Low“	0-6 km/h
„High“	0-40 km/h

AXLES

Front: Planetary drive axle, rigidly mounted. Limited slip-type differential 45%.
Rear: Oscillating (with cushioning) planetary final drive axle, with integrated reduction gear. Limited slip-type differential 45%.
Angle of oscillation ±12°

TIRES

Standard	23.5 R25 VJT Bridgestone
----------	--------------------------

BRAKES

Service brake:	Hydraulically actuated two-circuit power brake system. Oil-immersed multi-disc brakes in both axles, acting on all 4 wheels via 4-wheel drive.
Auxiliary brake:	Hydrostatic drive provides dynamic braking
Parking brake:	Spring-loaded brake acting on the discs of the rear axle

STEERING

Fully hydraulic, proportionally acting articulated steering. 2 steering cylinders with final positioning damping on both sides provide for powerful steering. The steering oil supply follows the load-sensing-system; this ensures that the working hydraulics oil volume is available to the steering system as needed, so that fast steering movements are possible even at low engine speeds.

Total steering angle	80°

Panoramic, tinted safety glass, with skylight window. 2 doors, 180° aperture angle, foldable rear mirrors. 2 front and 2 rear working floodlights. Sliding window in left door standard. Electrical windshield intermittent wipers with front and rear washing system. Cab heating through coolant heat exchanger with 3-speed heater fan, windshield defroster front and rear, 2 adjustable outlet nozzles for front window, foot space and rear windows. Heating blower convertible from circulating to fresh air mode. Fresh air filter with a dust filtration unit of 2.8 µm.

Ergonomically designed driver station with functional design, very good circumferential visibility and optimally designed control elements. All operating functions are ergonomically arranged. Driver's seat with hydraulic cushioning, progressively adjustable to operator's weight, lap belt, longitudinal and height adjustment, in compliance with ISO 7096 and ISO 6683. Level and elastically mounted driver cab floor makes entry and exit as well as cab cleaning easier.
