HÜDIG Waster Water Vacuum Aggregate

DIVA80/06, -/07

HUDIG® www.huedig.de

DIVA80/06

Application:

Construction Industry - Industry - Municipal Sector

- Averages
- Municipal technology
- Canal restructuring
- Sewage pumping
- Pit pumping
- Thick slurry pumping
- Slime pumping
- Transfer pumping

Function principle:

The water pump together with the vacuum generator both powered by Diesel engine ensure a continuous flow of the medium. There is a separator-chamber installed in front of the sewage pump which allows the air of the suction-line to be separated from the water and consequently the water pump conveys only the liquid medium. This combined system ensures a safe and fast suction process.

Features of DIVA 80/06::

- Fully galvanized tank frame skid
- Noise protection hood,
- Tank volume 226 I sufficient for at least 73 hours
- Self-priming sewage pump
- Belt transmission
- Dry-running rotation vacuum generator
- less maintenance, no oil change or process water control necessary
- fuel consumption at 100% load: 2,5 l/h
- fuel consumption at 50% load: 1,3 l/h
- sound power level: LWA = 86 dB
- calculated sound pressure level: LPA_{7m}=60dB(A), $LPA_{10m}=57dB(A)$

Special features of DIVA80/07 Longrun:

- Tank volume 511 I, sufficient for at least one week continuous operation
- Motor oil volume 5 l
