EVA 350

**Application:**

Building industry – Industry – Communities

- Average
- Domestic sewage
- Canal sanitation
- Sewage pumping
- Pit pumping
- Thick slurry pumping
- Slime pumping
- Transfer pumping

Function principle:

The sewage water pump together with the vacuum generator both powered by electric motors ensure a continuous flow of the medium. The separator-chamber, installed at the inlet of the sewage pump allows the air of the suction-line to be separated from the water and consequently the water pump conveys only the liquid medium. This combined system ensures a safe and fast suction process.

Features:

- Self priming sewage-pump aggregate with switch board
- Main plug 125 A
- Assembled on galvanized base frame
- horizontal sewage-pump with screw type centrifugal impeller
- dry running, almost service free vacuum pump
- separation of air/water mixture through galvanized air separation system
- switch board protection IP 54, with thermal motor protection for electric motor. The start of the sewage pump is being effected by an electronic starting current limiter. Dry running and overpressure protection are integrated

Options:

- Frequency converter

Type	Sewage Pump				Vacuum Pump			Motors					Shipping dimensions appr.		
	Capa- city	Head	Con- nection	Max. solid size	Capa- city	Va- cuum	RPM ¹⁾	Protectio n class	Vol- tage	Power		Rated current		Length x width x Height	Weight
